Bellflower should never have been divided into "districts. We are one city, not five!
This "districting" was an attempt by a group of citizens to promote one person who has been trying for years to become a City Council Member.
They were successful in bringing a lawsuit against the city to hold an election which was completely misrepresented to the public as being "for the public good".
The public bought it and it has accomplished nothing except to divide the city in five parts and nothing more!
We need to "redistrict" back to one city as soon as possible.
Thank you,
Larry Myers
